Mental Note for iPad in Education

Mental Note is actively being used by students at PS 231K in Brooklyn, New York.

Combine graphics, oral & written descriptions on a single page to create a mood diary entry

ideas as they

Students at PS 231K, in Brooklyn, New York, love using Mental Note. use for Bob Prince, the school's Tech Teacher explains: "we love the app [for and use it regularly... Our student population consists of young children with autism as well as K-5 students with severe emotional difficulties. I use Mental Note as a means of recording and displaying their work. It's very

effective."

One of the projects Mr. Prince has developed won the school a set of iPads from Apple, and a "Best Practices" award from the New York City Department of Education. The project is called "Design-a-Mood" and involves using Mental Note with a combination of apps to create "an on-going electronic daily journal. We

use four apps in order to complete an entry: Mental Note, Strip Designer [for decorating a photo of a student], Dragon Dictation [for dictating

feelings into text], and Pages [for graphing historical data]." The combination of the apps allows the students to keep a record of their moods. "This record can help us to track causes and potential solutions to problematic behavior. It works extremely well with our standard assessment kids in that it helps to build their metacognitive awareness."

The journal entry itself is created in Mental Note, since
Mental Note offers a very simple way to combine text, audio, pictures,
and sketches all together onto the same digital page. For more details,
view the full Design-a-Mood presentation.
